- Push & Go control system

Dalby Genesis Commercial Spray Booths

In the increasingly demanding world the Genesis C.V booth range provides the perfect commercial vehicle refinishing environment. Whether painting vans, light commercials, buses/coaches, tractor units, articulated trailers or even aircraft the Genesis C.V booth range provides the perfect commercial vehicle refinishing environment.

Restrictions within existing premises often require C.V finishers to tailor new spray booth/oven equipment to suit existing buildings. Our modular construction, flexible design approach and advanced manufacturing processes ensure the Genesis range of C.V spray booth/ovens is able to meet any client's operational and site requirements.

Designed and manufactured to virtually any size the Dalby Genesis C.V booth Range embraces the very latest technology to provide a durable, efficient, cost effective refinishing process.

Access Equipment

To comply with the latest guidance notes for 'Working at Height' we are able to supply and install mobile pneumatic platforms inside the spray booth. This unique system permits the operator to move vertically and horizontally along the entire length of the booth cabin to gain access to the vehicle being painted
